Project Title: Quotes Recommendation Chatbot

Project Design Phase-I - Solution Fit Template

Team ID: 171

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) CS

Students looking for motivation during studies or exams.

Social media users searching for quotes for captions or status.

Professionals seeking daily inspiration and productivity quotes.

People feeling stressed or emotionally low

6. CUSTOMER CONSTRAINTS CC

Limited time to search for meaningful quotes

Too many websites showing random or repetitive quotes

Lack of personalized quote recommendations based on mood

Difficulty finding quotes for specific emotions or situations

Existing platforms are not interactive or conversational

5. AVAILABLE SOLUTIONS AS

Current alternatives users rely on:

Quote websites
Social media pages sharing quotes
Quote mobile apps
Motivational books

Limitations:

Lack of personalization
No interactive AI assistance
Time-consuming searching process

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS J&P

Customers want to:

Find motivational quotes quickly

Get quotes based on their mood or situation

Discover new and meaningful quotes

Use quotes for daily inspiration or social media posts

Current problem:

Finding relevant quotes requires browsing multiple websites, which is time-consuming and inefficient.

9. PROBLEM ROOT CAUSE RC

Quote websites provide generic recommendations

No AI understanding of user emotions or preferences

Lack of interactive chatbot-based systems

Most platforms only provide static quote lists

7. BEHAVIOUR BE

Searching on Google

Visiting quote websites

Scrolling through Pinterest or Instagram

Copying quotes from blogs or images

Saving quotes from social media posts

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS TR

Feeling stressed, demotivated, or emotionally low
Searching for motivational quotes for social media posts.
Looking for daily inspiration or positivity.
Wanting quotes related to specific moods (happy, sad, success, love, etc.).

4. EMOTIONS: BEFORE / AFTER EM

Before using the solution:
Demotivated
Confused about where to find good quotes

After using the solution:
Motivated and inspired
Happy to receive personalized quotes

10. YOUR SOLUTION SL

We propose a Quotes Recommendation Chatbot powered by Generative AI and ReactJS.

The chatbot will:

-Allow users to enter their mood or topic (motivation, success, love, happiness, etc.)
-Use Generative AI to generate or recommend relevant quotes.
-Provide personalized quote suggestions.
-Allow users to copy or share quotes easily.
-Offer a simple interactive chatbot interface built with ReactJS.
-Deliver instant inspirational quotes without browsing multiple websites.

8.CHANNELS of BEHAVIOUR CH

8.1 ONLINE

Customers perform actions such as:

-Searching quotes on Google.

-Browsing quote websites.

-Looking for captions on Instagram / social media.

8.2 OFFLINE

Customers may also:

-Read quote books.

-Get quotes from friends or teachers.

-See motivational posters.

Identify strong TR & EM
